| • SSC
Indian Springs School | 2018
CGPA – 9.3 |

PROJECTS

Finding the Vulnerabilities (XSS, SQLI) Of Web Applications

Objective: The objective of this project is to detect SQL Injection and XSS vulnerabilities in web applications using automated scanning. This project identifies SQL Injection and XSS vulnerabilities in web applications by crawling web pages, detecting input fields, and testing various SQL Injection and XSS attack types. Web applications are widely used and are common targets for cyber-attacks, with SQL Injection and XSS being the most frequent and dangerous vulnerabilities.
